Crear ficheros de contenido aleatorio

útil para sobreescribir un disco... creará 10000 ficheros con datos aleatorios cogidos de `/dev/sda`, saltándose bloques aleatoriamente y leyendo bloques aleatoriamente

```
no_of_files=10000;
counter=1;
while [[ $counter -le $no_of_files ]];
 do echo Creating file no $counter;
  dd bs=65535 count=$RANDOM skip=$RANDOM if=/dev/sda of=random-file.$counter;
  let "counter += 1";
done
```
