Linux ls

último acceso

Cuando estás copiando y el fichero guarda la fecha original de creación, pero quieres ver la fecha de último acceso

```
ls -lu --time=ctime
```

- --time=atime : updated when the file is read
- --time=birth : updated when the file contents change. This is the «default» file time in most cases. (mtime)
- --time=ctime : updated when the file or its metadata (owner, permissions) change

```
-u - with -lt: sort by, and show, access time;
         - with -l: show access time and sort by name;
         - otherwise: sort by access time, newest first
```

```
Valid arguments are:
  - ‘atime’, ‘access’, ‘use’
  - ‘ctime’, ‘status’
  - ‘birth’, ‘creation’
Try 'ls --help' for more information.
```
